ALLOWANCE

1> This action is in response to Applicant's amendment, filed 9.28.2007. Claim 16 is amended. Claims 17-22 are cancelled. Claims 23-28 are added. Claims 16 and 23-28 are presented for further examination.

2> Claims 16 and 23-28 are allowed.

Allowable Subject Matter

3> The following is an examiner's statement of reasons for allowance: the independent claims distinguish themselves over the prior art by delineating a system with an integrated IP network consisting of a plurality of IP networks. The claims describe a variety of interconnected elements that operate to examine an IP packet sent from outside of a first network, compare information from the packet with information with one of two network nodes that contain a first or second table, and encapsulating the IP packet if the information matches the contents from either the first or second table of the first or second network nodes in order to form a new packet that can be sent through one of the plurality of IP networks. By the combination of these elements, the independent claims now clearly and distinctly describe important features of the encapsulation process that patently distinguish themselves from the prior art. Claims 23-26 and 28 are allowed due to their dependence on the independent claims discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
